

SUMMARY

Computer Science undergraduate (2027) with hands-on experience in Generative AI, RAG, software development, cloud computing, and automation. Experienced in Python, Java, JavaScript, React, Node.js, SQL, AWS, and REST APIs, with a strong foundation in Data Structures, Algorithms, Object-Oriented Programming, and database systems. Built AI agents, backend services, and applications through internships and projects.

EDUCATION

University of Petroleum and Energy Studies (UPES), Dehradun

B.Tech Computer Science & Engineering

Aug 2023 – May 2027

CGPA: 7.43/10

SKILLS

Languages: Python, Java, JavaScript/TypeScript, SQL, C
Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks
Web Development: React.js, Node.js, Express.js, REST APIs
AI & GenAI: Generative AI, RAG, LLMs, Embeddings, Agentic AI, Multi-Agent Systems, Prompt Engineering, CrewAI, AWS Bedrock
Cloud & DevOps: AWS (EC2, Bedrock), Docker, Git, GitHub Actions, CI/CD, Linux, Microservices
Databases: PostgreSQL, MongoDB, MySQL
Security: Cybersecurity, OWASP, Nmap, Burp Suite

EXPERIENCE

Software Engineering Intern

Ascendion, Bengaluru

Jun 2026 – Present

- Built a 3-agent CrewAI pipeline (AAVA platform) on AWS Bedrock using Claude models to automate resume reformatting: structured extraction → formatted rendering → Azure Blob Storage upload via SAS-token authentication.
- Created an output validation agent using bias guardrails and knowledge-base-grounded scoring to automate compliance checks and generate branded reports across **10+** Generative AI applications.
- Delivered **10+** Generative AI applications, automation tools, and agents using Python and LLM APIs, integrated through REST APIs and microservices.
- Worked with software engineering and DevOps teams to deliver **7+** production features through CI/CD pipelines, improving deployment reliability and release efficiency.

Full Stack Developer Intern

Weblicious, Dehradun

Jun 2025 – Jul 2025

- Developed client-facing web applications using React.js, Node.js, and MongoDB (**10+** Schema) with an API-first architecture.
- Implemented REST APIs and backend workflows, improving data accessibility and reducing API response time by **25%**.

PROJECTS

SOAR Intelligence – ML-Driven Security Automation Platform

- Engineered an event-driven microservices system using Wazuh SIEM, Cortex, TheHive, Redis, and Docker for automated incident detection, orchestration, and response.
- Trained and evaluated an XGBoost alert-triage model using 15,000 synthetic and 30,000 real-world KDD Cup '99 records, achieving **92.41% accuracy**, **0.98 precision**, and **0.92 recall** while preventing overfitting.

G-DriveX – Multi-Drive Cloud Platform (SaaS)

- Designed a full-stack SaaS application using React.js, Node.js, PostgreSQL, and Google OAuth 2.0 to manage multiple Google Drive accounts.
- Implemented secure authentication, token lifecycle management, and REST API optimization for improved scalability.

POSITIONS OF RESPONSIBILITY

Public Relations & Sponsorship Head – Cloud Security Alliance (UPES)

Sep 2024 – May 2026

- Led a team of 30+ members organizing university-level technical events including hackathons, WebGenesis, and Funtopia 5.0, from concept through delivery.
- Directed sponsorship outreach for AWS Community Day Dehradun 2025 (**1,000+ attendees**), securing industry collaboration including GitHub.
