## SUMMARY

Computer Science undergraduate with hands-on experience in building scalable backend systems and full-stack applications. Strong in system design, API development, and performance optimisation with a focus on writing clean, efficient, and production-ready code.

## EDUCATION

**University of Petroleum and Energy Studies (UPES)**

Aug 2023 – Present

B.Tech in Computer Science and Engineering

## SKILLS

**Languages:** JavaScript, Python, SQL

**Frontend:** React.js, Tailwind CSS

**Backend:** Node.js, Express.js, REST APIs

**Databases:** MongoDB, MySQL, PostgreSQL

**Tools:** Git, GitHub, Docker, Postman

## EXPERIENCE

**Full Stack Developer Intern, Weblicious**

May 2025 – Jul 2025

- Reduced page load time by **45%** (2.5s to 1.4s) by optimizing APIs.
- Built scalable REST APIs handling concurrent requests, improving system throughput by **15%**.
- Improved database query performance by **30%** through indexing and optimization.
- Enhanced backend reliability via structured error handling and modular architecture.

## PROJECTS

**SOAR Intelligence (Event-Driven Automation System)**

2026

- Architected a distributed event-driven system processing **10K+ logs/min** for real-time automation.
- Orchestrated webhook-based asynchronous workflows, reducing manual intervention by **60%**.
- Engineered microservices (Node.js, Redis) for real-time data streaming, improving system efficiency by **40%**.

**G-DriveX – Multi-Drive Cloud Platform**

2025

- Developed a SaaS platform supporting **multiple Google Drive accounts per user** in a unified interface.
- Integrated secure OAuth 2.0 authentication, handling **100+ token refresh cycles/day** securely.
- Optimized REST APIs for file operations, boosting backend performance by **35%**.

**Cyber Kill Chain – Attack Analysis Framework**

2026

- Applied the Cyber Kill Chain model to analyze **multi-stage attack scenarios** across **7 phases**.
- Identified and mapped attack stages including reconnaissance, exploitation, and exfiltration with improved threat visibility.
- Designed visualization workflows to track threat progression, reducing analysis time by **30%**.
- Correlated attack patterns with system data to enhance detection accuracy and incident response efficiency.

## LEADERSHIP

**Public Relations and Sponsorship Head, Cloud Security Alliance (UPES)**

Sep 2024 – Present

- Led outreach for AWS Community Day Dehradun 2025 with 1000+ attendees.
- Increased registrations by **55%** through targeted campaigns and partnerships.
